NOTICE TO DOG OWNERS

Please Help Protect Association Landscaping

It has come to our attention that several trees and shrubs on Association property have sustained damage due to dogs chewing or stripping bark from the trunks. This type of damage can seriously harm or kill the plants, resulting in costly replacements and negatively impacting the community's appearance.

We kindly remind all dog owners to be mindful and prevent their pets from damaging the Association landscaping. Please ensure your dog is kept under control at all times while on common area property, and avoid allowing them to bite, chew, or scratch at trees and other vegetation.

Your cooperation in helping to maintain and protect our shared community spaces is greatly appreciated.

Thank you for your attention to this matter.
